DB-Design

German: native

English: fluent

Summary

25 years of experience in programming with a strong focus on PHP based web applications since about 10 years. I usually made framework-less apps from scratch, but could work with frameworks like Laravel or Symfony as well. Second focus: design of databases and plain SQL development.

Special skills

AI superpowers: 3-4 times productivity through AI usage. Passionate about making minimalistic web apps, reducing the effort, and the use of AI tools in development. At some point I
